BENCHMARK IN TRANSFORMER SERVICES

MESSAGE FROM MD

Today our civil government, our military, our industry, and our intire population, relias on power. Today and in the future such dependency is on increasing as power plays vital role in the development era, the success of Power industry lies on supplying of good quality of Transformers which we called as the backbone, Therefore, our singular dependency on assured Transformer as the heart of this industry is more prevalent than ever. The best way to assure quality, services and reliability is to design, develop, and integrate transformers in a way that does not allow defects and vulnerabilities in the first place.

Our core purpose is to study analyze & improve the weaknesses of current industry & create the bench marking of MSC Transformers across the globe.
